

Environmental policy

Commitment:

Wharehine is committed to protecting the natural environment that we work and live in. We commit to providing our staff and subcontractors with the correct training and equipment to ensure that we minimise or eliminate any negative impact on our surrounding environment.

Awareness:

We will encourage a high level of environmental awareness for our people, our contractors and the public through:

- Personal accountability.
- Commitment and employee participation.
- Teamwork and communication.

Best Practices:

We will develop and implement best environmental practices. Specifically:

- Identifying, eliminating, minimising, and monitoring any work-related environmental hazards.
- Encouraging timely and accurate reporting of any environmental incidents.
- Supporting the fast and full remedial action for any environmental incidents that may occur.

Training:

We will provide and promote training for all employees in safe work practices and environmental responsibilities.

Employee Involvement:

We will encourage all management, staff and any employee representative groups to actively consult and participate in achieving our environmental objectives.

Continuous Improvement:

We will actively monitor and review procedures and processes to ensure continuous improvement in the quality of our environmental performance.

Responsibility & Compliance:

The responsibility to comply with all appropriate legislation, regulations, codes of practice and safe operating procedures lies with all company staff, subcontractors and any person(s) working directly on behalf of Wharehine. In addition, we aim to ensure that management at all levels to be responsible and accountable for the environmental practices of employees working under their direction.
